

```
import java.util.*;

public class Main {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        char x = sc.next().charAt(0);

        if (Character.isAlphabetic(x))

            System.out.print("Alphabet");

        else

            System.out.print("Not an alphabet");

    }

}
```
